Barberton, Ohio.

Sealed proposals will be received at the office of the Director of Public Service, Barberton, Ohio, until 12 o'clock noon, Eastern Standard time of the 31st day of March, 1924, and then publicly opened and read for constructing a complete delivery system from the Water Purification Plant to the present mains in the City of Barberton, Ohio, comprising the following approximate quantities:

32 valves ranging in size from 4 inch to 24 inch.

2,350 tons of cast iron bell and spigot pipe 6", 8", 12", 16" and 24".

20 tons of special castings.

The furnishing of all labor and material necessary for the laying of the pipe called for above including the setting of valves and special castings, the construction of valve chambers, crossings and all work incidental thereto.

The furnishing and installing complete of a 1,150,000 gallon steel storage tank.

Payment for the performance of the above work will be made as stipulated in the form of contract which is on file in the office of the Director of Public Service. Copies of the plans, proposal forms, specifications and forms of bonds can be seen at the office of the Director of Public Service and can be obtained from that office or from the office of Wm. G. Clark, Consulting Engineer, 1046 Spitzer Building, Toledo, Ohio, upon deposit of Twenty-Five ($25.00) Dollars for each set, which will be refunded provided they are returned in good order on or before April 15th, 1924.

Each proposal or bid must contain the full name of every person or company interested in same and shall be accompanied by a bond executed by the bidder and a Surety Company satisfactory to the Director of Public Service on the form marked "A" and attached to the form of proposal in the sum of 10% of the proposal or bid; or in lieu of such bond the bidder may deposit with the Director of Public Service a certified check on a solvent bank in the City of Barberton, Ohio, or the City of Akron, Ohio, payable to the order of the Treasurer of the City equal in amount to such bond.

Said bond or certified check is required as a guarantee that if the bid is accepted, a contract will be entered into and the performance of it properly secured.

The contract bond will be fifty (50%) per cent of the amount of the contract.

Labor and material bid for must be separately stated, with the price of each.

Bidders must furnish satisfactory evidence of their experience and ability to construct work of the character required.

Bidders must use the printed forms provided for the purpose as none other will be received.

The Director of Public Service reserves the right to reject any or all bids or to accept any bid which he may deem advantageous to the City of Barberton.

J. F. MENTZER,
Director of Public Service.

CONSTRUCTION NEWS

Engineering News-Record, March 20, 1924

The Construction Barometer

February Contracts Exceeded January for First Time Since 1921—Heavy March Construction Volume Indicated

FEBRUARY contracts for engineering construction published in *Engineering News-Record*, exceeded the January value, except in New England and the Middle West. This February rise has not occurred since 1921. Record February permits point to heavy building lettings in March. This is the more likely, since lumber and steel prices are easier and prices of other basic materials are steady.

The Construction Barometer

Gain in Private Construction—Production of Basic Materials Slower—No Actual Weakness in Price Situation

THE gain in value of contracts awarded during the last week, as published in *Engineering News-Record*, was due mainly to increased letting of private work. The accompanying table shows the trend during the last three weeks. There was also a substantial gain in private building construction of the commercial type, valued at $150,000 or over. Despite the increasing building demand, production is slowing down as shown by the charts. No actual weakness, however, exists in the present price situation, although buyers are able to obtain price concessions in most of the basic materials.

The standard proposal form is attached to the specifications, copies of which will be furnished on application to engineer.

By order of The Board of Chosen Freeholders of the County of Gloucester.

CHESTER N. STEELMAN,
Clerk.

WILLIAM C. CATTELL,
County Engineer.

CONSTRUCTION NEWS

Engineering News-Record, April 3, 1924

The Construction Barometer

Buying Is Slow With Price Concessions Obtainable—Danger of Price Rise Due to Limited Stocks of Materials

ALTHOUGH materials' reserves are limited, particularly in dealers' warehouses, there is little tendency to purchase for replenishment of stocks. Buying is slow and price concessions are to be met with in most of the basic materials. The lumber market is quiet and about the only steel items active at the present time are railway supplies and structural shapes. Cement and brick, however, are reported as being in better demand. Advancing labor cost is confined to the skilled trades as some unemployment in unskilled and semi-skilled labor has been reported to *Engineering News-Record* during the week. Materials stocks can not get too close to the "boards" without a revival of demand. The increased demand, however, will be immediately reflected in rising prices.

The Construction Barometer

Increase in Volume of March Construction Due to Lower Cost—Materials Stocks Adequate for Present Needs—Little Buying for Replenishment Despite Easier Prices

HESITANCY in buying characterizes the materials market at the present time. Prices are easier yet there is no forward purchasing tendency. Reserve stocks of materials are adequate for present needs but replenishment will be necessary before the season advances much further. That this condition is temporary is indicated by the high rate of production now being maintained in most of the basic industries. While the bulk of the present output is on orders already placed, there is some confidence in demand for the near future, otherwise production would decline. The increased volume of March construction consequent to decreased cost is shown in the accompanying charts. The *Engineering News-Record* Cost Index Number for April is 221.6 (1913 = 100) as compared with 224.7 last month and 213.5, one year ago.

CONSTRUCTION NEWS

Engineering News-Record, April 24, 1924

The Construction Barometer

Demand Active—Materials Plentiful—Mill Deliveries Prompt—No Labor Troubles of Importance—Prices Fairly Steady—Money Readily Available

THE eastern half of the United States shows a heavier total value of contracts let for the first quarter of this year than for the corresponding period in 1923. The West fell below last year as shown by the accompanying charts. Reports to *Engineering News-Record* for the third week in April reveal decided gains in lettings for municipal and public utility construction as well as in private work. Awards for large commercial buildings, though not so heavy during the last week as at the beginning of the month, are increasing in number and total value. The present construction market is one of active demand, plenty of materials, prompt mill deliveries, satisfactory labor conditions (so far as strikes and disputes are concerned), fairly steady prices and readily available money.

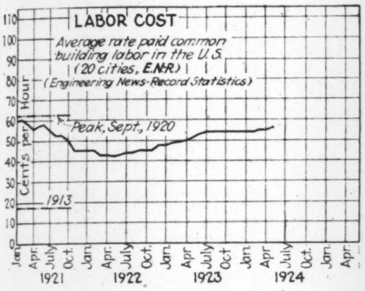
CONSTRUCTION NEWS

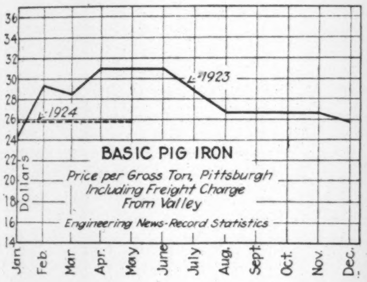
Engineering News-Record, May 1, 1924

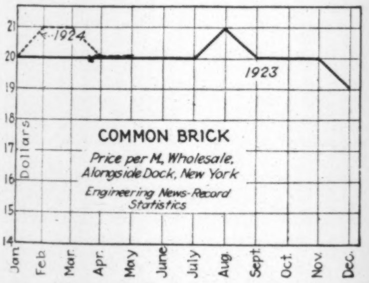
The Construction Barometer

Prices Weaker Owing to Lessening of Demand—Labor Cost Mounting Higher—No Buying for Replenishment of Stocks

THE price situation in most of the basic materials is weaker owing to gradual lessening of demand. Reserve stocks of building materials are ample and for this reason chances of higher prices in the immediate future are very small. The tendency of buyers at the present time is to keep down indebtedness and inventories. Decreased demand and sharper competition for business has resulted in a slight lowering of steel prices. Reports received within the week from the lumber industry, however, indicate a revival of production, shipments and new orders. While there are at present no strikes of importance in the building industry, the cost of common as well as skilled labor is mounting higher, as shown by the accompanying chart.







Engineering News-Record Statistics

Minimum on water-works and excavations, $15,000; other public work, $25,000; industrial buildings, $40,000; commercial buildings, $150,000.

Street Improvements

Roselle Park, N. J.

Sealed Proposals will be received by the Mayor and Council of the Borough of Rosselle Park, Union County, N. J., at 8:30 P.M. (Daylight Saving Time) on Friday, May 9, 1924, at the Borough Hall in said Borough, for the Improvement of the following named streets in said Borough with reinforced concrete pavement and bluestone curbing: Webster Avenue from Locust Street to Sherman Avenue, Sherman Avenue from Webster Avenue to Grant Avenue, Lehigh Place from Webster Avenue to Clay Avenue.

The estimated amount of surface pavement required is 15,500 square yards; curbing, 8,400 lineal feet.

Plans, profiles, cross sections and specifications for the above work, prepared by the Borough Engineer, are on file in the office of the said engineer, 505 Chestnut Street, Roselle Park, N. J. and 100 East 45th Street, New York City, and may there be inspected by prospective bidders. Bidders will be furnished by the engineer with a copy of the specifications and blue prints of the plans and profiles on proper notice and payment of the sum of $5.00.

Bids must be made on the standard proposal forms in the manner required by the specifications; must be enclosed in sealed envelopes bearing the name and address of the bidder on the outside, addressed to the Mayor and Council, Borough of Roselle Park, Union County, N. J., and must be accompanied by a certificate of a surety company guaranteeing the furnishing of a bond on the work, and also accompanied by a certified check for not less than 5% of the total bid, and be delivered at the place and on the hour above named.

The Council reserves the right to reject any or all bids, to waive any or all defects or informalities, or to accept any bid as they may deem for the best interests of the Borough.

By order of the Mayor and Council of the Borough of Roselle Park, N. J.
April 18, 1924.

J. WALLACE HIGGINS,
Borough Engineer.

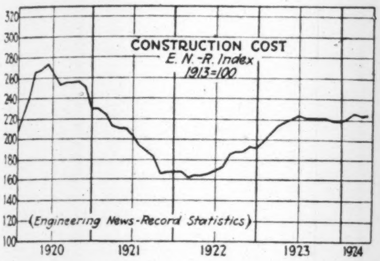
CONSTRUCTION NEWS

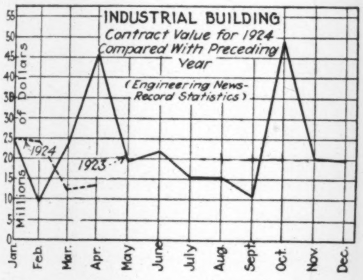
Engineering News-Record, May 8, 1924

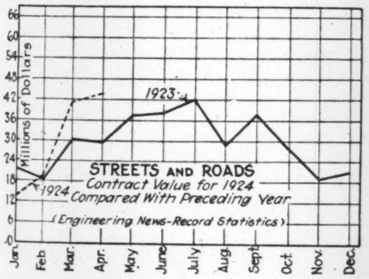
The Construction Barometer

Contracts Show Increase During First Week in May — Volume for Month May Be Smaller Owing to Higher Labor Cost and Restriction of Demand for Materials

THAT the volume of May construction may not measure up to the mark attained last month is suggested by the accompanying charts of *Engineering News-Record's* Construction Cost and Volume Index Numbers. The Cost Index in March was 224.7, in April it was 221.6 and in May, 222.4. The cost drop in April gave rise to a greater volume of construction for that month, therefore the rise in the May cost level will probably have the reverse effect. Cost is greater than a year ago; volume is smaller. The advance in the May Cost Index was due principally to higher wage schedules for building labor, since prices of materials have been steadily tending downward during the last thirty days.







Engineering News-Record Statistics

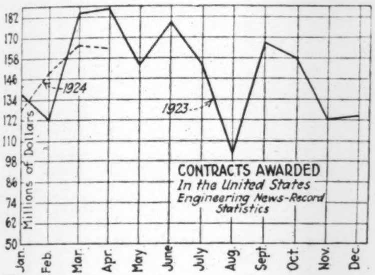
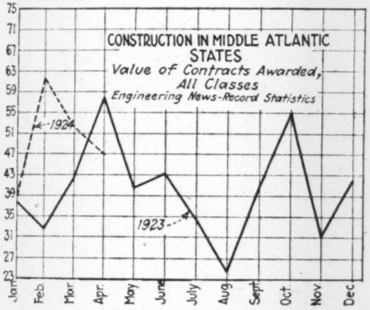
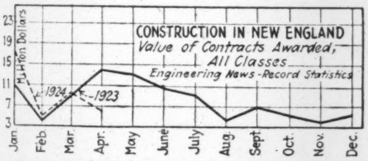
The Construction Barometer

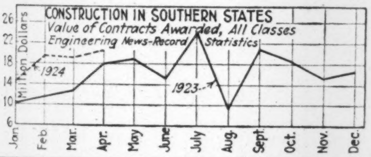
South, Middle West and Far West Show Construction Gains During April — Steady Increase in Large Contract Letting During Past Three Weeks— Public Building Awards Slower

GAINS in construction during April, as compared with the month preceding and with the corresponding period in 1923, occurred in three sections of the country, namely, the South, the Middle West and the Far West. In all the other geographic divisions there were declines. Large contract letting, however, has shown steady gains over the entire country during the past three weeks. Both private and public construction have contributed to these gains. Large public building awards have fallen off gradually since the week of Apr. 24. Judging from the number of large projects now out for bids, any gains in contract letting during the next three weeks, will be in private work.









Engineering News-Record Statistics

Minimum on water-works and excavations, $15,000; other public work, $25,000; industrial buildings, $40,000; commercial buildings, $150,000.

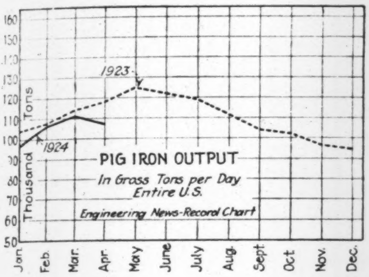
CONSTRUCTION NEWS

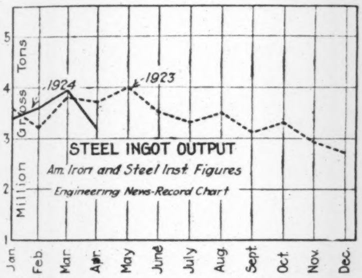
Engineering News-Record, May 22, 1924

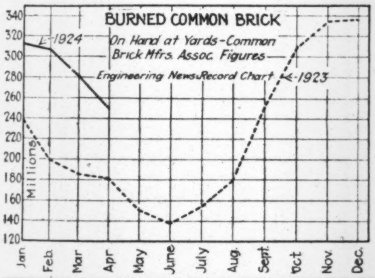
The Construction Barometer

Drop in Iron and Steel Production—Lumber and Cement Output Increased—Fewer Building Permits Being Issued—Decline in Large Contract Letting

THE drop in the pig-iron output and falling off in steel production and demand offer sharp contrast to the upward trend in lumber and cement production and increased consumption of common brick. This situation is depicted in the accompanying charts. Production appears to be following the regular seasonal trends so far as the basic materials are concerned. Cement and brick reserves, however, are heavier than a year ago, while there is less lumber and steel on hand. The whole production situation is settling down to a point where the mill output will be curtailed to meet the immediate needs of the consumer and the buyer will endeavor to keep warehouse stocks as low as possible. There are fewer building permits being issued and large contract letting has fallen off during the last week. A slight gain, however, is noted in the number of large public jobs now out for bids.







Engineering News-Record Statistics

Minimum on water-works and excavations, $15,000; other public work, $25,000; industrial buildings, $40,000; commercial buildings, $150,000.

0.28	mile of 10-inch cast iron force main, together with other and appertaining construction.

All of said work to be done in accordance with the plans, profiles and specifications prepared by Waldo S. Coulter, Consulting Engineer, 114 Liberty Street, New York, N. Y., which said plans, profiles and specifications were adopted by the Borough Council of the Borough of Sayreville, at the meeting held on Wednesday, February 20, 1924, and which said plans, profiles and specifications are now on file in the office of the Borough Clerk, Borough Hall, Sayreville, N. J., where they may be seen by prospective bidders, or a set of Information for Bidders, Form of Proposal, Form of Contract, specifications, plan, and profile, can be secured from Waldo S. Coulter, Consulting Engineer, by the payment of Four Dollars ($4.00) in cash, none of which will be returned. All bids must be made on the form of proposal attached to the Information for Bidders, and must be enclosed in a sealed package or envelope.

Each bidder must accompany his bid by a certified check for Three Thousand dollars ($3,000.00) payable unconditionally to the Treasurer of the Borough of Sayreville, as a guarantee that the bidder will within ten days from the date of notice of award of the contract to him, furnish the Borough with the required bond and execute the contract.

Each bidder must accompany his bid with a certificate from a surety company, stating that such surety company will provide said bidder with a bond of the form and in the sum required. The successful bidder will be required to furnish a surety company bond to the Borough of Sayreville, for the faithful performance of the contract and protection of labor and materials furnished in said contract according to statutory requirements, in a sum at least equal to the estimated cost of the work, said bond to be approved by the Borough Attorney.

The Mayor and Borough Council reserve the right to reject any or all bids, if in their opinion it is to the best interest of the Borough so to do.

All of said work must be completed on or before the first day of December, 1924.

FRANK P. KOLB,
Borough Clerk.

Approved:
FRANK HARTMAN, Mayor.
THOMAS H. HAGERTY,
Borough Attorney.
WALDO S. COULTER,
Consulting Engineer.

The Construction Barometer

Current Situation One of Curtailed Production, Small Quantity Buying and Few Price Changes — Car Loadings and Public Contract Letting Gain

CAUTION is the prevailing element in the current market. The situation is one of curtailed production, small-quantity buying and few changes in prices. The upward trend in volume of construction during April evidently resulted from lower construction cost, as shown by the chart. Since the first week in May, however, there has been a steady decline in contract letting with the possible exception of a slight gain in public awards, mostly for buildings. Latest reports show that revenue freight loadings, while somewhat under a year ago, are heavier than last month and also greater than during May, 1920, '21, and '22. The general trend of trade and industry. with the exception of building, is downward and few signs point to an immediate change in the situation.
